Dowling Lake Septic System Nutrient Loading Survey

These questions are meant to collect information needed to determine the approximate amount of phosphorus and nitrogen that enters Dowling Lake from residential septic systems. This information is being collected as part of a larger project which aims to determine from where the sources of nutrients within Dowling Lake originate. This project is being funded through a grant awarded to the Dowling Lake Association. No identifying information will be attached to these survey responses.

1.	Is there any sort of A. Yes	f septic system on your I	_	No	perty? (This is the end of the survey you)
2.	What type of sept A. Holding Tank B. Mound Syster C. Conventional D. Cesspool System	m	E. F.	At- Pre	ry? (Select all that apply) egrade System e-Treatment system known
3.	On average, how many days per year is your Dowling Lake property in use?				
4.	On average, how	many people are present	when your Do	owli	ng Lake property is in use?
5.	To the best of your knowledge, is your septic system currently up to date and functioning as intended?				
	A. Yes	B. 1	No		C. Unsure
